In the Corporate world I was an Administrative Assistant to a Vice President of a major corporation in Silicon Valley and helped implement a universal manufacturing system

During this time I supported several VP's, Managers, Supervisors and Engineers.

Special interests: sewing, scrapbooking, travel and personal goal is to visit all the units in the National Park System.

I enjoy working with the public and interacting with people from all walks of life. Everyone brings something to the table. I would like to see the NWA grow in numbers.
